

Data2Mobiity

Data-driven intelligence, now right on your mobile

One-Stop-Solution for Big Data, Business Intelligence & Predictive Analytics over Mobile "On – Premise" & "On-Cloud"

Mission Statement

Our mission is to empower our customers and partners build, deliver and manage innovative scalable and cost effective enterprise software solutions that enable them to make faster, accurate data-driven decisions, improve operational efficiency and increase profitability.

Overview

Data2Mobiity is a SAAS platform that brings corporate data on to a mobile device(iOS/Android) in a secure and scalable manner by using "Command Center" control panel which authenticates and ensures the delivery of "right information" to the "right user" using a device specific native custom visualization. Data2Mobiity specializes in complete suite of BI and Predictive Analytics, provides end to end development on all BI related modules that includes ETL and then extending it to predictive analytics.

Key Statistics of Data2Mobiity

- Established in the year of 2016
- One-stop solution for subscription support, consulting and System Integration services for an end to-end custom built (Big) Data Warehouse, Business Intelligence (BI) and Predictive Analytics based upon business requirements both on-premise and on-cloud.
- We offer managed onsite-offshore delivery model that leverages labor arbitrage and which can be tailored to achieve even 100% offshore delivery.
- Our team has incredible skills and experience in handling Big data, BI and Predictive analytics.

Key Features of Data2Mobiity

Data2Mobiity provides quick and secure access to data, is available for iOS and Android devices. Once correctly authenticated, users can easily access all their business data without having to re-authenticate. Some of the Key features of Data2Mobiity are:

- Over the Air App update:** The application gets updated automatically over the air (wireless updates).
- Dedicated Sync:** New data updates will be synced with the device using push notifications as back-end changes occur.
- Offline Capability and Cache Management:** Data can be accessed even without internet connectivity, as the cache provides in-memory storage and data management.
- Highly secured:** All devices are authenticated with a Device Unique ID and credentials. Each device is known and controlled by the Command Center.

Significant features of Data2Mobiity inclined for Pharmaceutical vertical are:

- **Analytics**
- **Visualization**
- **Write back**

Technical Specifications

Server Requirements - **Server 1: 56GB RAM, 500 HDD, 8 cores**
Server 2: 56 RAM, 1TB HDD and above based on the usage,8 cores
Mobile Platform : Android/iOS

Partnerships of Data2Mobiity

Data2Mobiity has strategic alliances with various innovative technologies partners to better support the growing demands of our customers. We have formed strategic platform, solution partnerships with some of the most important software developers in existence.

Platform Partners :
Microsoft Azure

Solution Partners :
TimeXtender,
Microsoft

Data2Mobiity Verticals

Data2Mobiity has worked with customers from a diverse range of industries. Some of the list of verticals we work :

- Pharmaceutical
- Insurance
- Manufacturing

Midtier Tools

Java 7
MS SQL Server
TimeXtender's
Discovery HUB
Tomcat Web Server
